**Chair** by: Elda Guterres da Silva National Coordinator TL-EITI (MPMR)

The chair opened the meeting with Mr. Rui Matos, Senior Manager Assurance Ernst and Young. EY presented the draft Scoping Report Study to the MSWG members in order to generate discussions.

The Draft scoping studying and draft Reporting Template have been sent to the TL-EITI secretariat and circulated to MSG members. EY expects comments from MSWG prior to finalizing the report. Almost 75% Information are capture in the scoping studying because it's public available either in ANPM website or in annual financial statement. Most of the information contain in the Scoping studying will be made available in the final public report.

Government	Have provide comments and it has been accommodated
	Trave provide comments and it has been accommodated
Government Entity Industries	Currently reviewing the draft report provided. Industry seek clarification in relation to Section 6.1.1 of the Draft Scoping Study  Confidentiality provisions in PSCs The model PSC used by Timor-Leste contains a confidentiality provision which prevents the public disclosure of information relating to O&G operations by both parts. Over the short term and before the commencement of the reconciliation phase,this confidentiality provision would need to be waived to permit EITI reporting. The waiver can be a short-form written instrument (e.g. side letter) between all parts which provides for:  • an exception to the confidentiality provision for EITI disclosure; and • a commitment or undertaking by both parts to comply with any EITI and disclosure requirements. However, over the long term such provisions should be amended to allow disclosure for EITI purposes and include an EITI reporting obligation on the operators and Timor-Leste representatives
	As informed by EY for old contract the waiver can be a short-form written instruments (E.g. side letter) between company and government. also in some country they change the PSC specify oblige disclose by EITI is permit.  According to EY the existing commitment from Industry to be involved in EITI, take part in MSWG and provide data for EITI report is sufficient measure to the issue stated above.

CSO	No comments
EY	Stated in the meeting that they have provided draft reporting templates specifically catered for different reporting entities. These draft reporting templates will be sent to all the reporting entities as soon as possible to allow for comments.
	EY clarified that they will prepare a separate draft Reporting templates specifically for data reconciliation, which will never be made public. Then

Industry  Will wait for the draft reporting template from EY to continue with review and provide comments.  Industry appreciate the clarification on the separate reporting templates and hope to receive the draft document as soon as possible.  EY  Informed MSWG that they will need the MSWG to decide on one crucial point, which is the threshold for materiality. This decision is crucial to drive the revenue sharing stream and the types of company to be included in the scope.  Without correct level of threshold agreed by MSWG, EY could include around 70 – 80 companies in the report.  Industry  Seek clarification on data to be reported on exported production  EY  Based on EY's experience in dealing with PSC regimes such as Timor –  Leste, the exported amount should be the amount lifted.  The amount produced and the amount lifted should not show too much of a difference.  Government  Confirmed that tax is paid based on lifted amount  EY  EY noted partly information in scoping studying are missing such as:  1. Timor-Leste National Account 2000-2014 need to update.  EY informed weather to leave as it is now or wait until obtain National Account 2015 is release then update it.  MSG need to decide it  GE  GE informed National Account for 2015 is currently under review by Ministry of Finance (MoF).  EY  2. Total Production Data  EY Noted in ANPM website have disclose total production data in BOE however according to the EITI standard requirement 3.2 Implementing countries must disclose production data for the fiscal year covered by the EITI Report, including total production volumes and the value of Production by commodity.  EY will propose draft template for disclosing production data by commodities then MSG need to discuss and decide it.		they will create another draft reporting template to be included in the final EITI reports.
